BUILD & VERIFICATION REPORT · V1.0

AMBER

All phases implemented, tested, and verified - with real AI running inside.

Fifty-seven work orders: the forty-order dossier build, the Live Assist real-time extension, and the v1.2 real-intelligence delivery - a bundled glm-4.6 provider that works out of the box, opt-in cloud STT, schema-honest prompts, and an elevated Warm Calm interface. Proven by 73 tests, a live AI round trip, and a zero-error browser journey.

Prepared by the AMBER Build Guild
